

## BOX-2102

Outdoor protection for manual call points

### Description

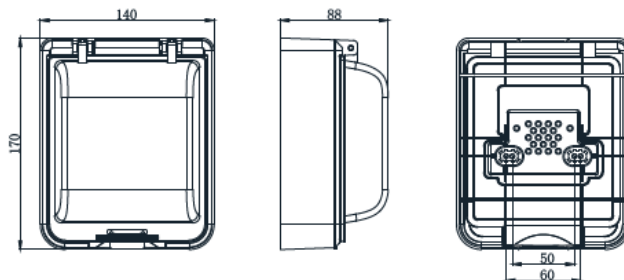

Outdoor protector for PCD-100, MAD-450 or MAD-450-I manual call points. The protector incorporates an upper and lower housing combined with internal sealing gaskets to achieve water resistance, weather damage, dust protection, prevent vandalism or misuse or situations of unintentional activations of the manual call points.

The buckle design of the protective case facilitates quick and easy opening and closing. The transparent upper casing allows observation of the product's operating conditions in real time. Additionally, the rubber integrated into the base of the protective case can be perforated for wiring insertion while maintaining its water and dust resistance.

### Technical features

Physical features	
Dimensions:	140 mm x 170 mm x 88 mm
Upper casing material	PC
Lower casing material	ABS
Dimensions:	
IP Index:	IP66
